EXPERIENCE

Developer, Reax (Nashville, TN)

2016 -

- Planned and carried out daily scrums, weekly estimations and retrospectives and pair programming.
- Managed projects with agile methodologies in JIRA and Pivotal Tracker via user stories and customer issues.
- Designed and implemented database architecture for applications using MySQL and Postgres
- Learned new technologies such as ReactJS, Node, and Elixir/Phoenix

Developer, Metova (Franklin, TN)

2015-2016

- Collaborated with designers and clients regarding product definition, schedule, scope and project-related decisions.
- Implemented continuous integration process for effective deployments of code to development, staging and production servers using Jenkins.
- Maintained a minimum 90% test coverage on all my projects by writing unit and integration tests with RSpec, Capybara, and FactoryGirl.
- Participated in weekly team meetings to present newly developed features and to help formulate new features, which were added as tickets to Flux (system similar to JIRA)

Developer, Scripps Networks Interactive (Knoxville, TN)

2011-2015

- Java developer for the Search and Information Retrieval Team producing RESTful web services for the following brands: Food Network, HGTV, Cooking Channel, and Great American Country (GAC)
- Experience with Endeca and Solr search engines
- Developed an OSGi application used to deliver millions of sweepstake data to multiple internal consumers for business analytics
